

Professional motion analysis

With a new generation of analysis, CONTEMPLAS offer a turn-key solution for both every-day problems including running/gait analysis, posture analysis and sports analysis.

The TEMPLAS motion analysis software enables users to streamline their workflow and create their own analysis protocol. The ease of use and user friendliness in combination with features like video overlay, automatic tracking, drawing tools etc. guarantee the maximum of analysis results based on powerful analysis tools and understandable reports. In particular predefined, but always customizable protocols, for running/gait analysis and clinical gait analysis in combination with third party analysis hardware such as EMG, force platform or foot pressure measurement are already implemented in the software.

- **TEMPLAS Lite for running analysis**
- **TEMPLAS Basic, Standard and Professional for performance gait and clinical gait analysis**
- **TEMPLAS 2D and 3D Posture analysis**
- **TEMPLAS highspeed golf swing analysis**
- **Foot pressure measurement**
- **Step determination by pressure measurement**
